BLACKHAWK®

2026 PRODUCT GUIDE

Knife Anatomy

As I reflect on almost 50 years of selling and making knives. The factory is reaching a milestone: 40 years of producing knives in Jacksonville, Alabama. We want to thank the customers and friends for all the years. The state of Alabama, the Chamber of Commerce, and the employees have been crucial to the factory's success. The employees who have honed their craft over the years and passed that knowledge to the next generation have built a tradition of constant improvement. Through innovation and new equipment, we keep quality and affordability top of mind. As a family-owned company and one of the largest knife manufacturers in the United States, my wife Sandy and I are also proud to see our son, Matt Griffey, confidently step into a leadership role within the company, ensuring all our products, customer needs, and relationships are maintained to the highest levels. I Look forward to this year as we continue to meet the growing demand for instrumental cutlery tools and am thankful for your choice in purchasing Bear & Son Cutlery products.

Welcome to the Bear Family,
Ken Griffey, Jr.; President

1. Hollow or taper ground blades
2. Popular blade styles
3. High carbon 440 rust resistant steel blades
4. Hand-matched blade and locking bar
5. All contact points are hand polished to ensure smooth operation
6. Tarnish-resistant nickel silver bolsters
7. Contoured handle for a great feel
8. Dated Dotted System*

Previous Decade Tang Stamps:

1990's: Bear MGC .....USA.....

2000's: Bear & Son .....USA.....; Bear & Son J'ville, AL .....USA.....

2010's: Bear & Son Pelle, AL ★★★ USA ★★★; BEAR MGC ★★★USA★★★

* This Dotted System is ideal for the knife collector. It lets the collector know when his pattern was manufactured.

How the Dot System works is:

Look at BEAR & SON U.S.A. (Example)

Count the stars on the tang stamp which counts 3, subtract the number of stars away from the year 2030 and it equates to the manufacturing year of your knife. In this example, 2027.

See our new millennium tang stamp for year 2020 to 2029:

BEAR & SON U.S.A.

= 2020

Bear & Son uses a prefix to the pattern number to designate the handle material.

1	Stainless Steel Handles
*2	Wood®
3	Delrin®
4	Kraton cushioned grip
**5	Genuine India Stag Bone™
6	Bone (natural or dyed)
7	Zytel®
8	Mother of Pearl
9	Mica Pearl or odd handle materials
CB	Cocobola
AB	Abalone
**GS	Genuine Stag
WSB	White Smooth Bone

* On wood handle knives the end of pattern a letter is placed for (R) Rosewood (HW) Heritage Walnut (CW) Camo wood unless it is part of a series that all the handles are the same type of wood.

** From 1991 to 2006 the number '5' was the Prefix for Genuine Stag Horn. After the Embargo 'GS' was used to show Genuine Stag Horn while the '5' changed to Genuine India Stag Bone™ after 2006.

Steel

Bear & Son products contain only quality USA blade steels (except Sandvik made in Sweden). This is a quick reference to help with what blade steel is right for you.

High Carbon Stainless Steel:
440 Stainless Steel with our own formula.
Facts: Rust Resistant, holds an edge well, diamond or ceramic sharpener recommended due to the metal Hardness. 57-59 HRC

1095 Carbon Steel:
Steel loved by so many generations.
Facts: Holds a keen edge, very easy to sharpen, requires a light coat of oil to prevent rusting, stone sharpener is recommended. 58-60 HRC

High Definition 416 Layer Damascus Steel:
A true steel of beauty. Forging 2 types of Carbon steel with a nickel silver layer to make one great looking blade comprised of 416 layers.
Facts: Great edge retention, secret sharpness (Damascus never feels as sharp to the touch), very easy to sharpen, requires a light coat of oil to prevent rusting, stone sharpener is recommended.

M390 Stainless Steel:
A top-tier, high-performance steel known for its excellent edge retention, wear resistance, and corrosion resistance. Ideal for demanding tasks. 58-61 HRC.

D2 Steel:
D2 Steel is an air-hardening, high-carbon, high-chromium tool steel. It has high wear and abrasion-resistant properties. Facts: It is heat treatable and will offer a hardiness in the range of 59-61 HRC and is machinable in the annealed condition.

Sandvik 14C28N Stainless Steel:
New to the Bear & Son Line. An impressive, high molecular strength steel from Sweden. 57-59 HRC
Facts: Great edge retention, rust resistant, diamond or ceramic sharpener recommended due to the metal Hardness. (only available in our stainless bowies & letter openers this year).

CPM-154 Stainless Steel
A premium grade stainless steel, that is made in the USA, which offers great corrosion resistance with toughness and a great edge. 58-60 HRC

CPM-S35VN Stainless Steel
A premium grade stainless steel, that is made in the USA, which offers great corrosion resistance with elasticity, toughness and a great edge. 58-61 HRC

The Story Of a Classic

Bear and Son Cutlery is proud to manufacture our 4th Generation Series, made of high-polished 1095 carbon steel blades and popular yellow Delrin®, Heritage Walnut and Red Stag Bone handles. The 4th Generation name comes from the style knife I remember my Papa sitting on the front porch on Saturday afternoon, listening to a Braves game on the radio and peeling an apple. I would try to peel that apple without breaking the peel. My Papa Griffey would always accomplish this seemingly impossible task. I can also remember sitting with my Papa, Dad and Uncle whittlin' a piece of cedar. I can still smell that pile of fine shavings at the end of the day.

These knives have 1095 Carbon Blades, Nickel Silver Bolsters, & round 4th Generation Shields.

We are the only commercial knife manufacturer offering knives with Damascus blades. Damascus steel combines steels of different properties and produces blades with extraordinary toughness and edge-holding ability. Known as the Steel of the Ancients, Damascus knives and swords have lived in legend since the creation of Damascus steel nearly 2,000 years ago. The ancient city of Damascus was one of the centers of production of this steel. That, combined with the fact that the steel resembled the damask cloth which was being produced in the city of Damascus- both having a "water-marked" pattern- gave this steel its name. Viewed under a microscope, the cutting edge of a Damascus blade displays tiny saw-tooth carbides which are formed by forging in a coal fire. This enables the blade to cut even when it feels dull to the touch. Flexibility is superb. Every piece of Damascus is as unique as a thumb print. When ground on an angle, as in a blade, the displayed pattern is stunning. Note: Limited quantities available.

NEW MEMBER OF THE BEAR & SON CUTLERY® FAMILY!

BEAR OPS

Bear & Son Cutlery® is a family owned company started in 1991 with the mission of manufacturing the "Best knives made in the USA" at our fully contained 41,000 sq ft facility in Jacksonville, Alabama. Bear and Son Cutlery is now proudly introducing a new division-Bear OPS®. Because we take our obligation of duty and to our country very seriously; our goal is to manufacture the best Tactical Knives available for those who serve. Bear OPS® knives are made with (OPS) Operational Precision for Superior Tactical Knives that can be relied on for any situation.

- Only USA manufactured parts, material, and a dedicated workforce.
- Bear OPS® uses only premium 154CM, CPM-S35VN, 14C28N, D2 and 1095 Carbon steel for our blades and use our own heat treat, waterjet, and CNC grinders to finish the blades.
- Bear OPS® Knives are designed and engineered by the experts in our R&D and our in-house tool makers. You will always be proud to carry a knife from Bear OPS®.
- Lifetime Limited Warranty on all Bear OPS® Knives.

LD - Blade is made of Ladder Damascus

Sandy, Matt & I have enjoyed working on bringing you theses quality handcrafted Bear OPS knives. We have worked with a couple of designers along with Matt, and the R&D department to bring you some exciting patterns. Plus we have bought more equipment to do all the handles in-house. We hope you will enjoy being a part of the Bear & Son Cutlery family.

WARRANTY:

All Bear OPS® products are guaranteed against defects in workmanship and materials for the life of the original purchaser. This guarantee is voided by misuse, abuse, improper maintenance, or alterations of the product and does not cover any normal wear or tear that might occur. Bear & Son Cutlery® and Bear OPS™ will determine cases of abuse. Using your Bear OPS™ folding knife or fixed blade knife for any purpose other than cutting or puncturing is considered abuse and may void your warranty.
*See warranty card for complete warranty/information.

SHARPENING:

Bear & Son Cutlery® and Bear OPS™ offers a sharpening service for our products at no charge. Please include payment for $8.00 to cover the cost of return shipment to you. Never sharpen your knife on a power grinder as it will destroy the blade and voids all warranties.

STEEL:

CPM-S35VN: A premium grade stainless steel created especially for knife blades. It has uniform carbide distribution and clean steel properties. As a blade material it offers excellent resistance and SUPERIOR EDGE QUALITIES. In keeping with the Bear & Son philosophy CPM-S35VN is an American made steel.

1095: Holds a keen edge, easy to sharpen, light coat of oil to prevent rust.

14C28N: Premium steel, corrosion resistant, tough and great edge retention.

154CM: Premium grade steel, that is also American made, which offers great corrosion resistance with toughness and a really good edge.

D2 Tool Steel: D2 steel is an air hardening, high-carbon, high-chromium tool steel. It has high wear and abrasion resistant properties. It is heat treatable and will offer a hardness in the range 59-61 HRC, and is machinable in the annealed condition.

High Definition Damascus: Is 416 layers of medium and high carbon steel with added nickel to magnify definition. Flexibility is superb and every Damascus blade is as different as a fingerprint. Damascus offers a very good cutting edge.

BEAR EDGE™

We are excited to bring you a new knife line! This line will consist of eight new knives. Bear Edge™ is the brand and is assembled in the USA with parts manufactured overseas from facilities using high tech aircraft aluminum, G10 and ball bearing action. These are assisted opening knives with 440 USA stainless steel blades, heat treated, ground and assembled in Jacksonville, Alabama. Part of this line is built in the USA with EDC, Predator, and Survivor Series knife line with ball bearing washers and assisted opening. The handles are aircraft aluminum and Zytel®. Bear Edge™ will also have a 14 SKU line manufactured in an overseas China factory following our manufacture guidelines, so you can have an imported line you will be proud to carry.

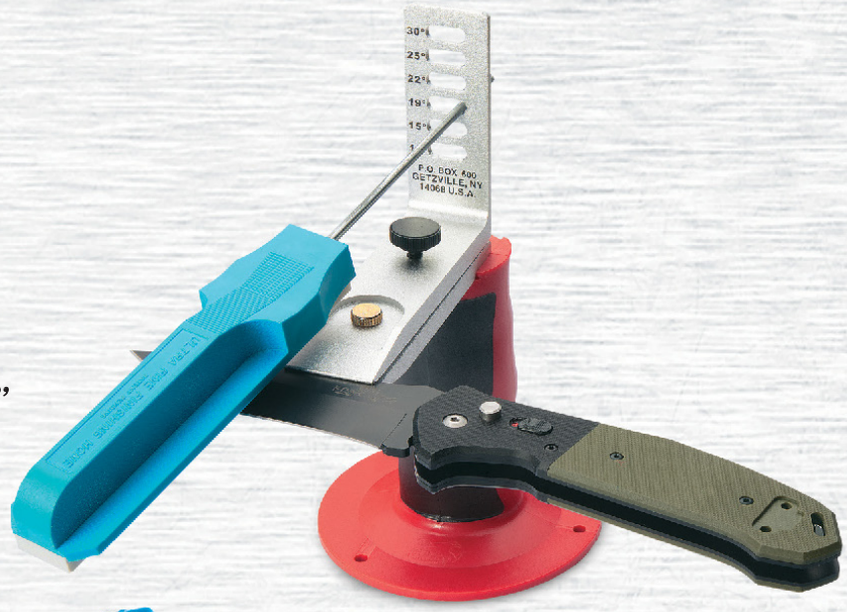
GATCO®

We sharpen your world!®

GATCO® Sharpeners

"We sharpen your World!"



GATCO which ranks among the top three sharpening companies in the world, rounds out the Bear & Son product line and provides a one stop shop for knives and sharpening.

Bear & Son purchased the GATCO® sharpening line with a mindset that these sharpeners are the highest quality product in the manual sharpening industry. GATCO®, produce some of the finest sharpening equipment in the world and carry several different types of sharpeners that are perfect for all Bear & Son knives. "Bear & Son is equipped with a rich family tradition in knife making and the GATCO® brand is a perfect match," states Owner Ken Griffey. "The process for building stock for the new product line is already underway and we are looking forward to offering this new line to our retail partners in an effort to help complete their knife needs," continued Griffey.

No. 6224
GATCO® Super Micro-X™ Sharpener

The ultimate touch-up sharpener for maintaining sharp edges everywhere you need them. Polymer housing holds two medium rods at pre-set angles to ensure ease and accuracy for sharpening, plus two fine sharpening rods for polishing the sharpened edge. Slip-resistant rubber pads provide the user with a secure grip. Sharpens all knives including serrated edges.

Size: 2 5/8" wide x 2 ¾" high (67 mm x 70 mm)

To sharpen, begin with the medium (brown) sharpening rods. Simply place the heel of the knife perpendicular to the work surface. Carefully draw the knife blade along the rod in a "slicing" motion to the tip of the blade. Repeat with the other side of the bade 10-15 times. To polish, turn over the Super Micro-X™ and use the fine ceramic rods (white) in the same way. Import

SHARPENS ALL PLAIN AND SERRATED BLADES

PDQ of 6: 6224P

No. 6402
GATCO® Double Duty™ Sharpener

This unique sharpener combines the best features of our GATSTIX® ceramic sharpener and Edgemate® carbide sharpener. Two precision ground, tungsten carbide blades pre-set at 35°, quickly sharpen the dullest blades in four or five light strokes. The two fine ceramic rods at a pre-set angle, put the polished, final edge on your blade.

The carbide and ceramic sharpening elements are set in an ABS Polymer frame with slip-resistant feet and slip-resistant gripping pads. Import

Size: 2 5/8" wide x 2 ¾" high (67mm x 70mm)

Easy to Use

Top: Draw knife completely through the carbides in one steady motion.

Repeat 4-5 times.

Right: Polish the edge using the two fine ceramic rods with a slicing, sharpening motion.

PDQ of 6: 6402P

No. 40006
GATCO® MCS™/Military Carbide Sharpener

The GATCO® MCS™ Sharpener is the ultimate, lightweight, compact sharpener designed specifically for tactical knives. Precision ground industrial carbide blades, set at a 40° angle, quickly restore a razor sharp edge to all plain edge knives.

This sharpener is designed for the military end user who requires lightning fast resharpening in the field where every second and every ounce is critical in the performance of their equipment. Import

Size: 2.75" x 1.06" x .30" (69.8 mm x 26.9 mm x 7.6 mm)
Weight: 1.6 ounces (.04732 kgs)

No. 40021 Replacement bits
The ultimate lightweight, compact sharpener designed specifically for tactical knives

Ideal for field use
Industrial carbide blades quickly restore a razor sharp edge

Easy to Use: Simply draw knife completely through the carbides in one steady motion. Repeat 2-3 times.

PDQ of 6: 40006P

No. 40001
GATCO® Carbide Knife Sharpener

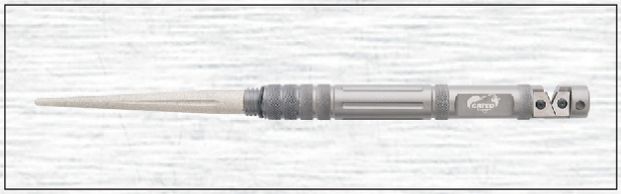
Engineered to ensure a fast, safe method to restore a sharp cutting edge to dull blades, the Edgemate® Carbide Knife Sharpener is a must for the kitchen, toolbox, for hunters, fishermen (and women), professionals in the trades and do-it-yourselfers.

Precision crafted from 6061-T6 structural grade aluminum with tungsten carbide sharpening bits set at a 35° angle, this tool ensures lightning fast resharpening and a durable edge. The handle is CNC checkered for a secure grip and is hard-coat anodized for rugged good looks and corrosion resistance. The Edgemate® Carbide Knife Sharpener is not recommended for sharpening serrated blades. Import

Two-piece replacement carbide bit set available: No. 40021

PDQ of 6: 40001P

Scepter® 2.0



No. 50015 GATCO® Scepter® 2.0

Features:

- 3.3" (76mm) 320 mesh tapered and grooved diamond rod sharpens serrations, hooks and pointed instruments
- Tungsten carbide sharpener sharpens all plain edged knives
- 1.75" (45mm) magnesium fire starter rod
- Lanyard hole for paracord attachment
- Hard coat anodized.

Length: 6.00" (152mm)

Diameter: .570" (14.4mm)

Weight: 2.3 oz. (.07 kgs)

Import

Compact, lightweight and multi-functioning, the new GATCO® Scepter 2.0 is the ultimate survival aid when sharpening and fire starting are necessities. Unique design nests magnesium fire rod inside tapered diamond sharpener and all are inside the CNC machined, solid 6061-T6 aluminum carbide sharpener body.

Each component has precision machined threads and an outer "O" ring.

PDQ of 6: 50015P

No. 60016 TRI-SEPS® Serration and Knife Sharpener

This triangular shaped, portable ceramic sharpener has a built-in angle guide to quickly restore a razor sharp edge to serrations, plain edges, entrenching tools, scissors, darts, fish hooks, ice picks, and other pointed instruments. The unique triangular design features two radius sizes and provides sharpening for both large and small serrations.

Made from premium grade 96% alumina ceramic.

Overall Length: 4 1/2"

Import

No. 60616 Diamond TRI-SEPS® Serration and Knife Sharpener

Designed to be the fastest sharpener to re-bevel serrations. Millions of monocrystalline diamonds resharpen serrations faster and more precisely than any other sharpener. The Diamond TRI-SEPS® unique triangular design features two radius sizes and provides sharpening for both large and small serrations. Also features two groove sizes for sharpening fish hooks, darts, ice picks, scribes, awls and other pointed instruments.

Made of monocrystalline diamonds

Overall Length: 4 1/2"

Import

Natural Arkansas Stones

Gatco® uses 100% natural Arkansas stone mined from NOVACULITE quarries that are carefully cut to size and skillfully finished to ensure flatness. NOVACULITE, highly regarded by craftsmen worldwide, has a unique crystalline structure which allows it to polish the cutting edge as it sharpens. All GATCO® Arkansas sharpening stones come with a custom wood storage case. USA

GATCO® Arkansas Tri-Hone Sharpening Sytem
Stone Size: 6” X 1.7” X 0.5”

GATCO® Arkansas Tri-Hone Sharpening Sytem

The premier, three-stone sharpening system includes a coarse silicon carbide stone for setting the bevel on dull or badly damaged blades, a 100% natural Arkansas medium stone for sharpening, a 100% natural Arkansas fine stone for polishing to produce the ultimate razor sharpness, and honing oil. All stones are mounted on a natural wood triangle which provides an elevated work surface for ease to use. An excellent choice for sharpening all sport, kitchen, D-I-Y cutlery, plane blades, chisels and wood carving instruments.

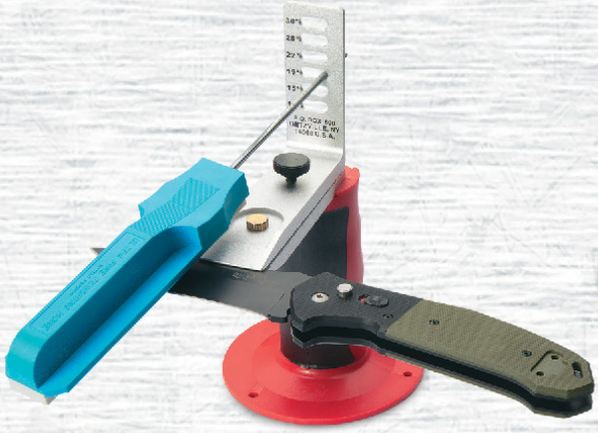
No. 10003 GATCO® Edgemate™ Knife Sharpening System

This comprehensive knife sharpening system offers chefs, handymen, sportsmen, and woodcarvers everything they need to put a professional, razor-sharp edge on all kitchen, sport, and utility cutlery. The unique knife/clamp guide ensures a precise honing action.

All GATCO® sharpening hones have an integral guide rod holder with easy-out for use, easy-in for storage sliding guide rod. Out premium grade abrasives ensure fast and efficient cutting of all steels, even those with have traditionally been difficult to sharpen.

The system includes:

- GATCO® exclusive knife clamp/angle guide
- Coarse sharpening hone
- Medium sharpening hone
- Fine sharpening hone
- Scientifically formulated honing oil
- Custom carrying case with instructions permanently affixed to the lid.
- GATCO® sharpening hones with longer, wider stones than competitive models, are ergonomically designed to reduce hand, wrist and arm fatigue. Safety rails protect fingertips.
- USA



No. 10005 GATCO® Edgemate™ Professional Knife Sharpening System

The system includes:

- GATCO® exclusive knife clamp/angle guide
- Extra-course sharpening hone (Black)
- Coarse sharpening hone (Yellow)
- Medium sharpening hone (Green)
- Fine sharpening hone (Red)
- Serrated knife sharpening hone (Blue)
- Scientifically formulated honing oil
- Custom case
- USA

This is the ultimate knife sharpening system that will sharpen all kitchen, sport, and utility cutlery including knives and cutting tools with serrated blades. Never before has a sharpening system done so much! This specialty product utilizes the GATCO® exclusive knife clamp/angle guide to ensure that all cutting tools can be easily sharpened to a precise razor-like edge.

No. 10006 GATCO® Ultimate Diamond Hone Sharpening System

The GATCO® Ultimate Diamond Hone Sharpening System contains:

- GATCO® exclusive six-angle knife clamp/guide
- Coarse monocrystalline diamond hone
- Medium monocrystalline diamond hone
- Fine monocrystalline diamond hone
- Special serrated knife sharpening hone
- 96% alumina ceramic finishing hone
- Scientifically blended honing oil
- Custom case with instructions permanently affixed to the lid
- USA

The person who demands the highest performance in a sharpening instrument demands diamonds. Diamonds, among the hardest cutting media known, can cut quickly and easily through the hardest steel. These properties provide the discerning customer with a sharpening instrument that will outperform any other type of abrasive media. This system offers the addition of a 96% alumina ceramic hone that provides a surgical finish to blade edges.

No. 12001 GATCO® Easy-Grip™ Clamp Mount

This innovative sharpening accessory holds your GATCO® knife clamp/angle guide to maximize ease of sharpening large knives or many knives in succession. The GATCO® Easy Grip™ Clamp Mount can be permanently attached to any work surface with screws or C-clamped for portability.

Import

Note: Clamp not included.

We have completely redesigned the packaging for GATCO sharpeners.

All the packaging will now be brightly colored with blue and gold. The new boxes for the sharpening systems are designed with the customer in mind. They have key features pointed out on the front of the box as well as what features make the GATCO sharpening systems superior to the competitor's versions. We have three different systems to choose from. The boxes are clearly labeled with which of the three they are as well as an image on the front of the box. Something else very helpful is, we have added instructions to the back of the boxes and the clam packs. These step by step instructions are easy to understand and also are accompanied by photos of the process. To help with which sharpener is best for a person's needs we have added a section letting you know what each one will sharpen. All these changes will make for an easier decision on which sharpener is best for the customer and why GATCO sharpeners are the ones to choose.

GATCO®

We sharpen your world!®

GATCO® Sharpening Accessory Hones

Perfect for upgrading your sharpening system or replacing used stones. Can be used with all GATCO® sharpening systems. All accessory hones contain our patent pending adjustable sliding guide rod and finger protection rails.
