

Remington CUTLERY

BEAR OPS MADE IN USA

2015 Product Guide

Made in the USA

Bear & Son Family

It all began in 1991 when Ken Griffey and two partners bought the Parker Edwards knife facility, a sister plant to W. R. Case & Sons in Jacksonville, Alabama, to create Bear MGC Cutlery. A lot has happened since then to establish Bear & Son Cutlery as a rising force in the knife industry.

After a series of twists and turns, including a time when the firm actually was owned by Swiss Army Brands, Ken Griffey still heads the operation as President. His son Matt, who began working in the factory when he was 18, is Vice-President, as is Ken's wife Sandy, who has played a key role as Vice-President of purchasing and premium department.

With their supervisors and management team, they bring a combined knife experience of more than 310 years, including positions with Gerber, Case, Parker Edwards and Schrade. They head a skilled team of 91 knife craftsmen.

As Americans become more and more concerned about jobs lost to overseas sources, they resent it when they see the words "Made in China" on a product. And they have less confidence in the quality and reliability – especially if it's a knife.

Bear & Son Cutlery meets the test because 100% of their high-quality knives are made in their state-of-the-art Jacksonville, Alabama plant, where they do all their own tooling, pressing, heat-treating, grinding, hafting, finishing and assembly.

"Our fundamental position is clear and absolute: we make high-quality knives, and we make them all right here in the U.S.A.," said Ken Griffey. "And when we say Made in America, we mean everything. We're a family company, and we are dedicated to keeping it exactly that way."

With a wide range of knives – from big Bowies to popular Butterflies – Bear & Son covers almost every knife need.

Their Bear OPS Division, launched in 2011, features a growing line of rugged tactical/survival knives.

While the Bear company began in 1991, for Ken Griffey you could say it actually began in 1976, when he went to work for Parker Cutlery, then a Tennessee knife distributor; or in 1986 when Parker USA started producing Damascus and stainless steel blades in Jacksonville.

Matt says he's been around knives as long as he can remember. From the time he was 4 until he was 10, his mother Sandy engraved blades in their home. And he began working in the factory while still in school.

Clearly, a family business that insists on top quality knives and is dedicated to America.

Remington® CUTLERY

Remington® Cutlery was first established in 1920. In February knife production began at Remington® Cutlery in Bridgeport, CT. by artisans brought over from Sheffield England. These artisans brought over with them the knowledge and creativity to produce what was then the bestselling line in the country. After more than a two year discussion and planning to begin the work, Remington® produces its first knife, the R-103 Jack knife. By June of the same year more than 6,000 Remington® pocketknives were being shipped per month. In May 1921 Remington® sales reach across the United States as salesmen begin taking orders through hardware jobbers. This was the beginning of one, if not the largest, knife manufacturing operations in this country. It lasted until 1940 when Remington® sold their entire knife operations to Pal Cutlery Co. At their peak they were making 10,000 knives every working day. Pal Cutlery Co. made their last knives in 1950 and immediately began to dismantle the manufacturing plant; thus ended the last of Remington's knife venture....until 1982. The Remington® Cutlery machines lay dormant until 1982 when Remington® needed a way to promote a new rifle that the firearms department was launching. Thus the reinstated collectible Bullet® Knife. From then until now Remington® has produced a Bullet® Knife each year. We are proud to say that Bear & Son Cutlery has the exclusive licensing agreement to manufacture Remington® Cutlery. In the short few months we have doubled the USA knife selection for Remington® and are working on more NEW and exciting items now. We have already started to make more of this line in the USA at Bear & Son Cutlery in Jacksonville, AL.

Knife Anatomy

Highest quality materials and years of experience in knife making combine to make our knives comfortable in hand, a beauty to behold and still tough enough to go the distance.

1. Hollow ground blades
2. Popular blade styles
3. High carbon 440 rust resistant steel blades
4. Hand-matched blade and locking bar
5. All contact points are hand polished to ensure smooth operation
6. Tarnish-resistant nickel silver bolsters
7. Contoured handle for a great feel
8. Dated Dotted System*

Previous Decade Tang Stamps: 1999 2000

Bear MGC .....USA.....

Bear & Son .....USA.....

Bear & Son J'ville, AL .....USA.....

* This Dotted System is ideal for the knife collector. It lets the collector know when his pattern was manufactured.

How the Dot System works is:

Look at Bear & Son J'ville, AL ★ USA ★ (Example)

Count the stars on the tang stamp which counts 3, take the 3 stars away from year 2020 and it lets you know that the knife was manufactured in 2017.

See our new millennium tang stamp for year 2010 to 2019:

Bear & Son J'ville, AL ✱✱ USA ✱✱ = 2010

BEAR MGC ✱✱✱USA✱✱✱ = 2010

Bear & Son uses a prefix to the pattern number to designate the handle material.

1	Stainless Steel Handles
*2	Wood®
3	Delrin®
4	Kryton cushioned grip
**5	Genuine India Stag Bone™
6	Bone (pick bone dyed)
7	Zytel®
8	Mother of Pearl
9	Mica Pearl or odd handle materials
CB	Cocobola
AB	Abalone
**GS	Genuine Stag
WSB	White Smooth Bone

* On wood handle knives the end of pattern a letter is placed for (R) Rosewood (HW) Heritage Walnut (CW) Camo wood unless it is part of a series that all the handles are the same type of wood.

** From 1991 to 2006 the number '5' was the Prefix for Genuine Stag Horn. After the Embargo 'GS' was used to show Genuine Stag Horn while the '5' changed to Genuine India Stag Bone™ after 2006.

Remington® pocket knives have the Remington® pattern number stamped plainly on the reverse tang of the master blade. The last digit of the number designates the handle material used:

1 – Rosewood
2 – Black
3 – Bone
4 – Pearl
5 – Pyremite, also White Bone
6 - Genuine Stag
7 - Ivory
8 – Cocobolo
9 – Metal
10 – Genuine English Buffalo Horn

Steel

Bear & Son products contain only quality USA blade steels (except Sandvik made in Sweden). This is a quick reference to help with what blade steel is right for you.

High Carbon Stainless Steel:
440 Stainless Steel with our own formula.
Facts: Rust Resistant, Holds an Edge well, diamond or ceramic sharpener recommended due to the metal Hardness.

1095 Carbon Steel:
Steel loved by so many for so many generations.
Facts: Holds a keen edge, very easy to sharpen, requires a light coat of oil to prevent rusting, stone sharpener is recommended.

High Definition 416 Layer Damascus Steel:
A true steel of beauty. Forging 2 types of Carbon steel with a nickel silver layer to make one great looking blade.
Facts: Great edge retention, secret sharpness (Damascus never feels as sharp to the touch), very easy to sharpen, requires a light coat of oil to prevent rusting, stone sharpener is recommended.

Sandvik 12C27M Stainless Steel:
New to the Bear & Son Line. We have been very impressed with this exotic Steel.

Facts: Great edge retention, Rust Resistant, diamond or ceramic sharpener recommended due to the metal Hardness. (only Found on our stainless bowies & letter openers this year).

Sandvik 14C28N Stainless Steel:
New to the Bear & Son Line. We have been very impressed with this exotic Steel.
Facts: Great edge retention, Rust Resistant, diamond or ceramic sharpener recommended due to the metal Hardness. (only Found on our stainless bowies & letter openers this year).

Work Series

We know when you work with your hands all day you need a good knife. This knife needs to be the most trusted and dependable part of your day. No matter how your day is going, when you need to cut something it's there ready to go. Affordable, great materials like High Carbon Stainless Steel, Zytel®, G10, & Solid Stainless Steel Liners. Dependable knives start with quality materials. The Stainless Steel Blades give you great edge retention, while the stainless liners make the knife strong and rigid. Handle Materials are ideally suited for the toughest Jobs. The Newest Material to this great Series of knives is G10. G10 is used by the tactical market in some of the toughest environments in the world. So as an American worker, trust in the knowledge that these are strong knives, built by Americans who know a hard day's work and what you want in your knife!

The Story Of a Classic

Bear and Son Cutlery is proud to manufacture our 4th Generation Series, made of high-polished 1095 Carbon Steel Blades and popular Yellow Delrin®, Heritage Walnut and Red Stag Bone handles. The 4th Generation name comes from the style knife I remember my Papa sitting on the front porch on Saturday afternoon, listening to a Braves game on the radio and peeling an apple. I would try to peel that apple without breaking the peel. My Papa Griffey would always accomplish this seemingly impossible task. I can also remember sitting with my Papa, Dad and Uncle whittlin' a piece of cedar. I can still smell that pile of fine shavings at the end of the day.

These knives have 1095 Carbon Blades, Nickel Silver Bolsters, & round 4th Generation Shields.

Kodiak Series

This new series of knives is named after the King of North American animals. These strong Kodiaks average 10 feet in height. So we made these quality knives to meet the Kodiak standards. Each knife is built of Tough, Strong Brass Liners, Nickel Silver Bolsters, 440 Highly Polished Blades and each knife is made with over 90 hand operations. The new Kodiak series is smooth and beveled with extra shaping and rounding to fit perfectly in your pocket. Each knife is hand buffed, sanded and polished to give it the look and feel of a classic pocket-ready knife.

Blue Jean Series™

Blue jeans were created in 1873 for the cowboy, miner and worker. In the 1950's, blue jeans became stylish clothing in America. Since then blue jeans have been a staple clothing item in most every American's closet. Blue jeans are loved for their comfort and durability; two reasons why they are the first choice by the American worker.
We wanted to honor this American classic with knives that are comfortable in the pocket and durable. These knives are highly polished and are made with durable materials such as blue G10 and high carbon stainless steel blades. These knives have a back pocket shield with B&S on the pocket. The blades are polished with a Bear & Son tang stamp.

We are the only commercial knife manufacturer offering knives with Damascus blades. Damascus steel combines steels of different properties and produces blades with extraordinary toughness and edge-holding ability. Known as the Steel of the Ancients, Damascus knives and swords have lived in legend since the creation of Damascus steel nearly 2,000 years ago. The ancient city of Damascus was one of the centers of production of this steel. That, combined with the fact that the steel resembled the damask cloth which was being produced in the city of Damascus- both having a "water-marked" pattern- gave this steel its name. Viewed under a microscope, the cutting edge of a Damascus blade displays tiny saw-tooth carbides which are formed by forging in a coal fire. This enables the blade to cut even when it feels dull to the touch. Flexibility is superb. Every piece of Damascus is as unique as a thumb print. When ground on an angle, as in a blade, the displayed pattern is stunning. Note: Limited quantities available.
